Profile Summary

Motivated and highly focused fresher with a strong interest in software development and a growing proficiency in Python programming. Demonstrates quick learning ability, adaptability, and a strong determination to solve problems through logical thinking and efficient coding. Eager to apply foundational knowledge in real-world projects and continuously improve through hands-on experience. Committed to building a successful career in the tech industry through consistent learning and hard work.

Education

Jay Ambe International School	2014 -2016
Shri S'ad Vidya Mandal Institute of Technology	2016 -2020

Project

Hometrix

Developed a web-based real estate platform designed to simplify the process of purchasing residential properties. The platform enables users to browse, filter, and view detailed listings of houses based on location, budget, and preferences. Key features include an interactive property map, user-friendly search interface, property comparison, and inquiry form for direct communication with sellers. Built using HTML, CSS, JavaScript, and Python (with Django for backend), the project demonstrates strong front-end design, backend integration, and practical implementation of web development principles.

Certificate

- LATEX - IIT Bombay
- Python for Data Science, AI & Development
- Graduate Apprentice Trainee certificate - IT Support
- Internship Certificate
